Instant service
22-25 gallons per hour

LET THE 450 HORSEPOWER BRAVE GET YOU OFF THE GROUND!

With the introduction of the Avtech 450 BRAVE, a new dimension has been added to Agri-Business Flying . . . Power. Available power when it is needed most, in the turns. The source of this additional power is the Pratt & Whitney R-985 Engine and the newly designed leading edge cuff for the wing that has been installed into the PA-36 Brave. The Pratt & Whitney is recognized as an available, dependable, and economical power plant. These units will be built and furnished by McDonald Aircraft Engines, Avtech's own Radial Engine Shop located in San Antonio, Texas. Therefore, service after the sale is a continual convenience for Avtech customers. The 450BRAVE is also available as a field modification to owners of either the 285 or 300 HP Brave.

WARRANTY

A T.B.O. of 1,000 hours will be recommended and Avtech's warranty will extend for 150 hours or 6 months, whichever occurs first.
